Issued under the Seal of the Authority

Environmental Policy

CEKOL ENGINEERING LIMITED: ENVIRONMENTAL POLICY

Purpose

The purpose of this environmental policy is to indicate our organisational commitment to addressing environmental issues within CEKOL ENGINEERING LIMITED and through the services we deliver. This document outlines what CEKOL ENGINEERING LIMITED will do to identify our environmental impact, how we will adapt to reduce our impact, and the responsibilities of team members in this space.

Scope

This policy applies to employees and contractors, both full time and part time. The policy will be shared with suppliers, potential partners and consultants wherever appropriate to indicate our commitment to environmental action.

Action

CEKOL ENGINEERING LIMITED is committed to accelerating a just transition to net zero and reducing the impact on the environment from our operations and service delivery. We will address this through the following areas of work:

Staff engagement

We will promote responsibility for the environment within the organisation, and communicate and implement this policy at all levels of our team. We commit to ensuring key members of staff have the time necessary to embed this work into our operations and providing further resource where possible and necessary.

We will encourage and support staff to set up a staff climate working group for those with a personal or professional interest in the area, making sure that this group is representative of all levels of the organisation.

We will support staff wellbeing by considering how we promote positive, action-led messaging about climate breakdown and provide opportunities for them to change the ways they work for CEKOL ENGINEERING LIMITED in line with positive climate behaviours. We will provide space for staff to discuss this issue, including their own concerns and worries about environmental breakdown, through any wider wellbeing programmes in place.

The senior management team of CEKOL ENGINEERING LIMITED will:

- Share its expectation of responsibility for the environment to employees, board members and secretariat service providers.
- Demonstrate clear commitment to the environment and lead by example, to ensure that the protection of the environment is promoted to all employees.
- Support team wellbeing and work to combat hopelessness by committing to driving action in the organisation, and setting a positive example.

The employees of CEKOL ENGINEERING LIMITED will:

- Be familiar with all the environmental requirements relevant to their role and responsibilities, including exploring the carbon footprint/environmental impact of specific areas of work;
- take responsibility for their own impact on the environment at CEKOL, sharing ideas with other staff members on how to reduce personal impact.
- The employees and board of trustees of CEKOL ENGINEERING LIMITED will:
- Recognises that climate breakdown is a strategic and systemic risk challenging the charity's ability to meet its objectives in the long term;
- Supports senior management and the wider staff team in addressing climate breakdown.

Operations

Our mission is: CEKOL ENGINEERING LIMITED. The sustainability of our services is important for the communities we work with.

As part of delivering our mission in line with our values and charitable objectives, we will assess the environmental impacts of our operations and set objectives and targets annually in order to improve our internal carbon emissions. We will review these targets annually. This work will include:

- Monitoring utilities consumption in office buildings and home working
- Promoting, encouraging and rewarding green travel choices from employees
- Conscious consideration of the amount of travel necessary for our services to go ahead, encouraging green transportation modes and/or providing remote access to events
- Review our waste and educate employees about effective recycling and reducing use of single use plastic where possible
- Communicate with the communities we work with about climate breakdown and how it is relevant to our mission, vision and values
 - Generally increase communications about the climate crisis, to encourage awareness within our networks and the communities we work with
 - Comply with all relevant environmental legislation and regulations
 - Sign up to ACEVO's climate leadership principles to structure our work and provide light-touch accountability.

Governance

Our board of trustees have overall responsibility for CEKOL ENGINEERING LIMITED and its strategy. We commit to exploring on an annual basis the impact climate breakdown will have or is having on the communities we work with. This work should be led by the management

Discussing at 12 board meeting per year how our mission, vision and values intersect with climate breakdown. This discussion should include how our beneficiaries will be affected by climate breakdown; where there is opportunity to collaborate and support wider climate action; and how to embed climate actions in our strategy, business planning and organisational goals.

- Providing a short statement in our annual report each year outlining the discussions we have had around climate breakdown and any action we have taken, alongside our aims for the following business year.
- Reviewing our investment policy and seeking to move to ethical funds wherever possible in line with Charity Commission guidance on balancing ethical investment and financial return.
 - o As set out in our Investment Policy we do not invest in fossil fuels/tobacco/polluting industries.
 - o [or] We follow the ethical policies set by management. We will explore: a) instructing our investment managers to use our shareholder votes to support climate transition, b) restricting other investments not aligned to climate transition, and c) looking at opportunities to increase green revenues from our investments.
- Making time to discuss practical strategic actions at 12 of board meetings per year/with our investment/remuneration/risk committees. This could include but is not limited to:
 - Including the climate breakdown on our risk register/s, in terms of the risk it poses to finances, reputation and service delivery, and decide on mitigating actions;
 - Reviewing our pension funds and explain to all employees how they can move their pension to an ethical fund if they wish to, in line with our values;
 - Considering the risk of climate breakdown to staff retention/recruitment and exploring how we can improve in this space.

Suppliers and procurement

The suppliers of CEKOL ENGINEERING LIMITED will:

- Share environmental policies or describe planned actions if a formal policy is not in place when entering into any contract or agreement with CEKOL ENGINEERING LIMITED.
- Work with us to reduce the impacts of the goods and services purchased from them wherever possible.

We recognise that although we may not be able to reject suppliers based solely on their sustainability credentials that asking questions raises the profile of this issue, and that we may partly influence behaviours through this action alone. Our engagement with suppliers is designed to identify suppliers with values which align with our own, and we will make public our preference to work with organisations who minimise their environmental impact wherever possible.

WORK HEALTH AND SAFETY POLICY

Goals

This policy:

- shows the commitment of (your business name)'s management and workers to health and safety
- aims to remove or reduce the risks to the health, safety and welfare of all workers, contractors and visitors, and anyone else who may be affected by our business operations
- aims to ensure all work activities are done safely.

Responsibilities

Management (the supervisor and / or manager) is responsible for providing and maintaining:

- a safe working environment
- safe systems of work
- plant and substances in safe condition
- facilities for the welfare of all workers
- any information, instruction, training and supervision needed to make sure that all workers are safe from injury and risks to their health

Workers are responsible for:

- ensuring their own personal health and safety, and that of others in the workplace
- complying with any reasonable directions (such as safe work procedures, wearing personal protective equipment) given by management for health and safety

Obligations

Management is firmly committed to a policy enabling all work activities to be carried out safely, and with all possible measures taken to remove (or at least reduce) risks to the health, safety and welfare of workers, contractors, authorised visitors, and anyone else who may be affected by our operations.

Responsibilities

Management:

Will provide and maintain as far as possible:

- a safe working environment
- safe systems of work
- plant and substances in safe condition
- facilities for the welfare of workers
- information, instruction, training and supervision that is reasonably necessary to ensure that each worker is safe from injury and risks to health

- a commitment to consult and co-operate with workers in all matters relating to health and safety in the workplace
- a commitment to continually improve our performance through effective safety management.

Workers:

Each worker has an obligation to:

- comply with safe work practices, with the intent of avoiding injury to themselves and others and damage to plant and equipment
- take reasonable care of the health and safety of themselves and others
- wear personal protective equipment and clothing where necessary
- comply with any direction given by management for health and safety
- not misuse or interfere with anything provided for health and safety
- report all accidents and incidents on the job immediately, no matter how trivial
- report all known or observed hazards to their supervisor or manager.

Application of this policy

We seek the co-operation of all workers, customers and other persons. We encourage suggestions for realising our health and safety objectives to create a safe working environment with a zero accident rate.

This policy applies to all business operations and functions, including those situations where workers are required to work off-site.
